

Credentialing Samples

To suit the needs of all our customers, we have designed VendorStat to be as comprehensive and customizable as possible. We have included a base configuration of core credentialing criteria which meet all minimum JCAHO guidelines. You can add to the minimums thereby creating a compliance model that best fits your needs.

The following table provides a sample implementation where the health care system has added to the minimum requirement to cover their individual requirements.

Credentialing Requirements	Remote	Non-Clinical	Clinical	Restricted
Administrative				
• HIPAA Business Associate Agreement	X	X	X	X
